Dementia

Last Modified January 06, 2025

Blackpool Council is committed to helping promote information, services and activities available to people living with dementia (and their families and carers), in order to improve their health and wellbeing.

Dementia describes a set of symptoms that may include:

- Memory loss
- Difficulties with thinking, problem-solving or language

These changes are often small to start with, but for someone with dementia they have become severe enough to affect daily life.

Dementia is caused when the brain is damaged by diseases, such as Alzheimer's Disease or a series of strokes.

For more information, services and support groups available please visit the [Public Health Blackpool website](#).
