Keepers of birds

Last Modified November 30, 2021

Avian Influenza is an issue that arises every year, mainly due to migration.

Whilst it is only a legal requirement to register if you have 50 birds or more, we would like to gather information on bird keepers in Blackpool.

This will help us in future to share information and advice to those who need it, in a targeted and timely manner, so that you can put in place control measures to protect your birds as soon as possible.

You can withdraw your consent at any time. [Further information on how the council processes your information and your rights](#) as a data subject can be found on our privacy notice.
