# Air quality management

Last Modified June 04, 2019

Council's are required to review air quality to assess whether defined air quality standards and objectives are being achieved.

They are also required to publish their findings.

Areas where standards fall short must be identified and air quality management areas declared in order to secure subsequent compliance with standards.

The information from the diffusion tubes is used in local plans, transport plans and the improvement of public health for Blackpool.

## Annual air quality report

To order a copy of the annual air quality report email [env.protection@blackpool.gov.uk](mailto:env.protection@blackpool.gov.uk)
